Direct Link Dedicated Hosting Pricing*				IBM Cloud Direct Link Dedicated Hosting requests and pricing will be handled on a transactional basis to account for regional differences in vendor availability and pricing.										
* IBM Cloud Direct Link Dedicated Hosting minimum configuration includes one (1) rack with 5Kw of power and two (2) ports at chosen speed. Additional collocation add-ons available.														
Global Routing (add-on)				\$2,999	\$2,999	\$2,999	\$2,999	\$2,999	\$2,999	\$2,999	\$2,999	\$2,999	\$2,999	\$2,999

Local routing (included as part of base offerings) includes access to all of the Data Centers connected directly to the PoP and provides unlimited ingress/egress traffic. If customers need to route their traffic outside the POP in the area within which they are ordering Direct Link, they must add the Global Routing option; otherwise, their traffic is restricted to the services provided by the local POP.

Global routing expands access to include all SoftLayer data centers globally. Bandwidth is metered and charged monthly based on the market. Details on the markets and other considerations can be found at: <https://console.ibmcloud.com/docs/infrastructure/direct-link/faqs.html#faqs> Each month, all customers using circuits below 10Gbps are allotted 10TB of free egress traffic; customers using 10G circuits are allotted 50TB. Overages are based on the table below, with the higher market rate prevailing. If you select Global Routing, you are not charged for any local egress traffic, only for traffic that originates or terminates outside of the local POP.

Overage Fees:
Market 1: \$0.05 per GB
Market 2: \$0.10 per GB
Market 3: \$0.15 per GB
